#### 4. FIRST AID MEASURES

##### 4.1 Description of first aid measures

Inhalation	Remove from exposure to fresh air. If breathing is difficult call a doctor immediately.
Ingestion	Wash out mouth and give to drink two glasses of water.
Skin contact	Remove contaminated clothing and shoes and wash immediately and abundantly with water for at least 15 minutes. Get medical attention if irritation occurs. Wash clothing before reuse. Thoroughly clean shoes before using them again
Eye contact	Remove contact lenses. Wash immediately with plenty of water for at least 15 minutes, opening the eyes. Consult a doctor if symptoms persist.

##### Reccomendation:

- **Need to see a doctor immediately** YES
- **Possibility of delayed effects following exposure** YES
- **Move the exposed individual from the place of exposure to the open air** YES
- **Remove the clothing and shoes of the exposed individual** YES
- **How to handle contaminated clothing** With gloves
- **For those providing first aid, wear PPE** YES

##### 4.2 Most important symptoms and effects, both acute and delayed

For ammonium salts the following applies in general: after ingestion: local irritation, illness, vomiting, diarrhea. Systemic action: after ingestion of large quantities, pressure drop, collapse, CNS disorders, cramps, states of narcosis, lack of narcosis, haemolysis.

Vanadium and its compounds cause: irritation after contact with the eyes and skin, irritation of the mucous membranes, cough and dyspnoea after inhalation. After the absorption of toxic quantities there are changes in the blood picture, weight loss and cardiovascular disorders.

##### 4.3 Indication of any immediate medical attention and special treatment needed

There are no known specific provisions

#### 5. FIREFIGHTING MEASURES

##### 5.1 Extinguishing media

**Suitable extinguishing media:** water spray, foam

**Non suitable extinguishing media:** none in particular

##### 5.2 Special hazards arising from the substance or mixture

Under certain conditions, the mixture of coal dust and air can give rise to an explosive atmosphere. If involved in a fire it can release toxic vapors of nitrogen oxides, ammonia, carbon monoxide.

##### 5.3 Advice for firefighters

Avoid raising dust clouds. Normal clothes to fight the fire, like a compressed air breathing apparatus open circuit (EN137), complete with flame retardant (EN469), flame-resistant gloves (EN659) and boots for firefighters (HOA29 or A30).

**6.1.1. For non-emergency personnel**

Keep away in case of dust clouds

**6.1.2. For emergency responders**

In case of dry product use a protective breathing (P2 filter) mask, and dust-proof gloves.

**6.2 Environmental precautions**

Prevent the cleaning water from the spill from entering water drains, sewers, groundwater.

**6.3 Methods and material for containment and cleaning up**

**6.3.1. Advice in order to contain a spill**

Recover the product dispersed and wash the residue with plenty of water. Avoid creating dusts.

**7. HANDLING AND STORAGE**

**7.1. Precautions for safe handling**

**7.1.1. *Raccomentations in order to manipulate the substance or the mixture in a safe manner, such as containment measures and prevention of fire and aerosol and powders formation***

Avoid raising dust clouds especially in the presence of possible sources of ignition. Wet activated carbon removes oxygen from the air, causing serious dangers for people in low-oxygen environments. Appropriate work procedures must be followed for operations in low oxygen potential environments. Use under a hood.

**7.1.2. *General recommendation on work hygiene***

Do not eat, drink or smoke in work areas; wash hands thoroughly after use and remove contaminated clothing and protective equipment before entering areas where you eat.

**7.2. Conditions for safe storage, including any incompatibilities**

**7.2.1. *Risk management associated with explosive atmospheres, corrosive conditions, flammability hazards, incompatible substances or mixtures, evaporative conditions, potential ignition sources***

Store in closed original container. Store in a well-ventilated, cool, and dry place.

**7.2.3. *Control of weather conditions, ambient pressure, temperature, sunlight, humidity, and vibration***

Store in the original container

**7.2.4. *Conditions for keeping substances / mixtures intact***

Keep away from oxidizing, unsaturated oils, gases or vapors, direct sources of heat, naked flames and other sources of ignition and direct sunlight.

**7.2.5. *Advice regarding the ventilation, specific design for storage rooms or vessels, quantity limits under storage conditions, packaging compatibilities***
