

Revisione n. VIII – 18.01.2023 Replaces revision n. VII – 21.01.2019

1.	IDEN.	TIFICATION OF THE SUBSTANCE/	MIXTURE AND OF THE COMPA	ANY/UNDERTAKING
	1.1	Product identifier		
		Chemical name	Potassium cyanide	
		Product code	POTN 01	
		C.A.S. Registry Number	151-50-8	
		EINECS Number	205-792-3	
		Molecular weight	60,5 g/mol	
		Raw formula	KCN	
		Commercial name	01-2119486407-29-XXXX	
		REACH registration number	POTN 01	
	1.2	Relevant identified uses of the		es advised against
		Intended uses		
		Uses adviced against	Industrial use	
		-	See section 15	
	1.3	Details of the supplier of the sa	•	
		Name	FAGGI ENRICO S.P.A.	
		Adress	•	03 50019 Sesto Fiorentino FI
		Telephone number	055311861	
		Fax number	055311791	
		Competent person responsible	for	
		the safety data sheet	lorenzo.magaldi@fa	
	1.4	Emergency telephone number	•	e operating in England, in
			Scotland (NHS 24) an	nd in Wales (NHS Direct Wales)
2.		HAZARDS IDENTIFICATION		
	2.1	Classification of the substance	or mixture	
		Hazard classes	Category codes	Hazard statements
		Met. Corr.	1	H290 May be corrosive to
				metals.
		Acute Tox.	1	H300 Fatal if swallowed.
		Acute Tox.	1	H310 Fatal in contact with skin.
		Acute Tox.	1	H330 Fatal if inhaled.
		STOT RE	1	H372 Causes damage to organs
				through prolonged or repeated
				exposure.
				Exposure route: oral and
				inhalation
				Target organs: thyroid
		Aquatic Acute	1	H400 Very toxic to aquatic life.
		Aquatic Chronic	1	H410 Very toxic to aquatic life
				with long lasting effects.
	2.2	Label elements		
		Pictograms	$\wedge \wedge$	\land
			\vee \vee	
		Signal words	DANGER	
		Hazard statements	Drittgen	
			H290 It can be	corrosive to metals

Revisione n. VIII – 18.01.2023 Replaces revision n. VII – 21.01.2019

	H300	Fatal if ingested
	H310	Fatal in contact with skin
	H330	Fatal if inhaled
	H372	Causes damage to organs through
	-	prolonged or repeated exposure
	H400	Very toxic to aquatic life.
	H410	Very toxic to aquatic life with long lasting
		effects
Additional hazard statement /	EUH032	Contact with acids liberates very toxic gas
identification elements (EU)		
Precautionary statements	P270	Do not eat, drink or smoke during use
	P273	Do not disperse in the environment
	P280	Wear protective gloves / clothing / eye
		protection / face protection
	P301+P310	IF SWALLOWED: Immediately call a
		POISON CENTER or doctor
	P302+P352	IF ON SKIN: Wash thoroughly with soap
		and water.
	P304+P340	IF INHALED: Remove victim to fresh air
		and keep at rest in a position comfortable
	D.400 D000	for breathing
	P403+P233	Keep container tightly closed and in a ventilated place
2.3 Other hazards	Hydrocyanic	acid can cause all levels of poisoning.
		tion of acids (including carbon dioxide)
		anide is released, which is flammable and
		losive gaseous mixtures together with air.
		t with acids, air humidity, water.
		ntain PBT/vPvB substances in accordance
	-	ion (EC) 1907/2006, attachment XIII contain substances that interfere with the
		stem in accordance with regulation (EC)
		rt.59 paragraph 1 and in compliance with
		stablished in Regulation (EU) 2017/2100
		on (EU) 2018/605.
COMPOSITION/INFORMATION ON	-	
3.1		

3.

CAS Number	143-33-9
EINECS Number	205-599-4
INDEX Number	Not available
ATE (oral)	LD50 5.09 mg/kg bw (rat)
ATE (inhalation)	LC50 (60 min) 63 ppm (rat)
ATE (dermal)	LD50 7.35 – 200 mg/kg bw (rabbit)
M factor (acute)	1
M Factor (chronic)	10
FIRST AID MEASURES	

4. FIRST AID MEASURES

4.1 Description of first aid measures

Revisione n. VIII – 18.01.2023 Replaces revision n. VII – 21.01.2019

Inhalation	Inhalation is possible if aerosols, mists, du No mouth-to-mouth or mouth-to-nose re respiration bag or artificial respirator. Dar the respiratory tract clean. In case of shor a doctor immediately for first aid (keywor	suscitation. Use artificial nger of intoxication. Keep tage of air, give oxygen. Call
Ingestion	hydrogen cyanide). Rinse mouth. Immediately drink plenty of Call a doctor for first aid immediately	
Contact with skin	(keyword: poisoning with cyanide / hydro If dry, undamaged skin comes into contac potassium cyanide, no cyanide poisoning case of contact with skin, wash with plent symptoms of intoxication, alarm the eme (keyword: cyanide poisoning / hydrogen of	t with dry sodium or has been observed so far. In y of soap and water. With rgency doctor immediately
Contact with eyes	The use of special washing solutions with borate buffer solution, diphtotherine, etc of first aid measures.	a high buffer capacity (e.g.
	Keeping the eye open, immediately rinse water for at least 10 minutes. With symptoms of intoxication alarm the	
	immediately (keyword: intoxication with o	
Recommendations		YES
 Need to see a door 	ctor immediately	YES
	yed effects following exposure	YES
	d individual from the place of exposure to the o	
air	· · · · · · · · · · · · · · · · · · ·	YES
 Remove the cloth 	ing and shoes of the exposed individual	With gloves
	ntaminated clothing	YES
	mptoms and effects, both acute and delayed	
	isoning: It seems appropriate to differentiate b	etween two stages:
1. Slight intoxicatio		C C
2. Severe intoxicati	on	
The following symp	toms do not provide sure indications of progno	sis.
Central nervous sys	tem symptoms:	
Initial stage: heada	che, dizziness, drowsiness, nausea.	
Advanced stage: co	nvulsions, coma.	
Pulmonary sympto	ms:	
Initial stage: dyspne		
	poventilation, Cheyne-Stokes breathing, apnea	
Cardiovascular sym	•	the last of the second s
	onia, sinus node arrhythmia, AV node arrhythm chycardia, complex arrhythmias, cardiac arrest.	hia, bradycardia.
Skin symptoms:	chycardia, complex armythinas, cardiac arest.	
Initial stage: Red co	mplexion	
Advanced stage: Cy	-	
	m: Lactate acidosis at pH 7.1 and lactate levels ι	ip to 17 mm / liter have been
described.	· · · · · · · · · · · · · · · · · · ·	, ,

4.2

Revisione n. VIII – 18.01.2023 Replaces revision n. VII – 21.01.2019

4.3 Indication of any immediate medical attention and special treatment needed Get immediate medical attention or contact a poison control center

FIREFIGHTING MEASURES 5.1 Extinguishing media

5.

Extinguishing media Suitable extinguishing media Unsuitable extinguishing media

alkaline fire fighting powder. water, carbon dioxide (CO2), foam, acid fire fighting material, acid fire fighting powders.

5.2 Special hazards arising from the substance or mixture In the event of a fire, hydrogen cyanide can be released.

5.3 Advice for firefighters General information:

Prevent the water used to extinguish the fire from flowing into the sewer, groundwater or surface water.

Equipment:

Normal firefighting clothing, such as selfcontained open-circuit compressed air breathing apparatus (EN137), flame retardant suit (EN469), flame retardant gloves (EN659) and firefighter boots (HOA29 or A30)

6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

6.1.1. For non-emergency personnel

Keep away from contaminated area and keep upwind

6.1.2. For emergency responders

Wear:

Semi-face masks with ABEK2P3 filters compliant with the EN14387: 2004 standard Chemical risk gloves compliant with EN420 and EN374 standards Splash goggles compliant with Directive 89/686 / EEC and standard EN166: 2001 Complete clothing compliant with the UNI EN 13034: 2006 type 6 standard

6.2 Environmental precautions

Do not send the product to the following compartments:

- ground
- ground water
- sewer

In case of pollution of rivers, lakes or sewers, inform the competent authorities in accordance with local laws.

In the event of a fire, the extinguishing water must not reach the sewers, the groundwater, or the surface waters. In the event of a fire, remove the endangered containers and take them to a safe place, if it can be done safely.

6.3 Methods and material for containment and cleaning up

6.3.1. Advice in order to contain a spill

Close (if possible) or cover drains

6.3.2. Advice in order to clean-up a spill

1. solid substance:

Collect mechanically. Collect in suitable containers. The collected material must be reused or disposed of according to regulations. To absorb the spilled substance, it is recommended to use an approved industrial vacuum cleaner.

Revisione n. VIII – 18.01.2023 Replaces revision n. VII – 21.01.2019

2. solution:

Absorb with liquid retaining material, for example: inert absorbent medium, diatomaceous earth or acid absorbent. Collect mechanically. Collect in suitable containers. The collected material must be reused or disposed of according to regulations.

6.3.3 Other information

The substance, the packaging, the fire extinguishing water and the remains of any fire must be sent to an appropriate disposal facility, in compliance with waste regulations.

6.4 Reference to other sections

7.

HANDLING AND STORAGE

7.1. Precautions for safe handling

7.1.1. Raccomentations in order to manipulate the substance or the mixture in a safe manner, such as containement measures and prevention of fire and aereosol and powders formation

Avoid the formation of dust and keep away from incompatible materials (acids, acid salts, aluminum). Use only under a suction hood. Keep fire extinguishers and means of containment such as inert absorbent media, diatomaceous earth or absorbent for acids nearby.

7.1.2. General recommendation on work hygiene

Do not eat, drink and smoke in work areas. Wash your hands after use. Remove contaminated clothing and protective equipment before entering eating areas

7.2. Conditions Safe storage, including any incompatibilities

7.2.1. Risk management associated with explosive atmospheres, corrosive conditions, flammability hazards, incompatible substances or mixtures, evaporative conditions, potential ignition sources

The product itself does not burn but if involved in a fire it can release toxic gases. Suitable containers: plastic.

In case of release of hydrogen cyanide: The formation of flammable or explosive dust / air mixtures is possible.

Keep suitable fire extinguishers and plenty of water near the substance. Open the containers under suction and close them immediately after use.

7.2.2. Control of weather conditions, ambient pressure, temperature, sunlight, humidity, and vibration

Keep in a locked and ventilated place. Protect against solar radiation and the action of heat.

- **7.2.3.** Conditions to maintain the integrity of the substance or mixture Store in original containers. Keep the containers tightly closed and store them in a dry and well ventilated, clean, dry, closable place.
- 7.2.4. Advice regarding the ventilation, specific design for storage rooms or vessels, quantity limits under storage conditions, packaging compatibilities Do not store near: acids and acid salts. Keep the substance in locked storage and with forced ventilation. Use ADR approved packaging permitted for the UN number UN1684 G.I. THE If stored in quantities exceeding 50 kg, you must be in possession of authorization for custody and conservation issued by the Toxic Gas Commission and must be kept in an authorized cabin with forced ventilation

			boiling range		

Revisione n. VIII – 18.01.2023 Replaces revision n. VII – 21.01.2019

Flammability	Not flammable
Lower and upper explosion limit	Not explosive
Flash point	Not flammable
Auto-ignition temperature	Not flammable
Decomposition temperature	Not available data
рН	Not available data
Kinematic viscosity	Not applicable
Solubility	400 g/L @ 20 °C and pH 7
Partition coefficient n-octanol/water (log value)	Log Kow - 0.25 @ 20 °C and pH 7

Vapour pressure	Not applicable
Density and/or relative density	1.56 @ 20 °C
Relative vapour density	1.8 hPa @ 634.5 °C
Particle characteristics	Solid potassium cyanide is
	commercially supplied with particle
	size between 40 and 355 microns:

therefore only a negligible fraction can

			reach the deep respiratory tract.
	9.2.	Other information	
		None	
10.		STABILITY AND REACTIVITY	
	10.1	Reactivity	
		Danger of hydrocyanic acid formation in c	ontact with acids, carbon dioxide, air
		humidity	
	10.2	Chemical stability	
		The product is stable under normal storage	ge conditions
	10.3	Possibility of hazardous reactions	
		Danger of hydrogen cyanide formation in	contact with acids, carbon dioxide, air
		humidity.	
	10.4	Conditions to avoid	
		When heated above 300°C, hydrogen cya	nide vapors may form
	10.5	Incompatible materials	
		Acids, acid salts. Over time, even the air c	an lead to the formation of hydrogen
		cyanide in a confined environment or in c	ontainers that are not hermetically closed.
	10.6	Hazardous decomposition products	
		HCN hydrogen cyanide (hydrogen cyanide	e)
11.		TOXICOLOGICAL INFORMATION	
	11.1	Information on hazard classes as defined	in Regulation (EC) No 1272/2008
		Acute toxicity	Oral: LD50 rat: 7.49 mg / kg bw
			Inahalation : LC50 (60 min) 63 ppm
			(rat)
			Dermal: LD50 7.35 – 200 mg/kg bw
			(rabbit)
		Skin corrosion / irritation	Scientifically unjustified studies
		Serious eye damage/irritation	Scientifically unjustified studies
		Respiratory or skin sensitization	Scientifically unjustified studies
